

# Nandhitha Binu

Linux System Administrator | Cloud Operations | Infrastructure Automation

Kottayam, Kerala | nandhithabinu2020@gmail.com | +91 9746950709 | LinkedIn | GitHub

## Professional Summary

---

Server Administrator Trainee with 6+ months of hands-on experience in Linux administration, AWS cloud services, infrastructure automation, and system monitoring. Skilled in administering RHEL 8 servers, provisioning and managing AWS services, including EC2, IAM, VPC, CloudWatch, Lambda, and EventBridge, automating infrastructure using Ansible, Terraform, and Bash, configuring Apache, Nginx, and MariaDB, and implementing monitoring with Prometheus and Grafana. Seeking an Associate role in IT Infrastructure & Cloud Operations to support reliable, secure, and highly available services through Linux administration, cloud operations, and infrastructure automation.

## Experience

---

**Server Administrator Trainee** | IPSR Solutions Limited Jun 2026 – Present | Kerala, India

- Administered AWS infrastructure using **IAM, AWS Lambda, and Amazon EventBridge**, implementing scheduled EC2 lifecycle management and enforcing least-privilege access controls.
- Deployed and managed **WordPress on AWS EC2 with Amazon RDS**, integrating custom domains and configuring Apache virtual hosting for production-ready web hosting.
- Orchestrated a secure **AWS VPC architecture** with public/private subnets and NAT Gateway, enabling controlled communication between application and database tiers.
- Configured and maintained **5+ Linux web services** using Ansible, including Nginx, PHP, MariaDB, SSL, SFTP, phpMyAdmin, and WordPress through Infrastructure as Code (IaC).

**Cloud & DevOps Intern** | IPSR Solutions Limited Jan 2026 – Jun 2026 | Kerala, India

- Provisioned and secured **10+ AWS EC2 instances**, implementing IAM policies, security groups, and SSH access controls across Linux environments.
- Automated Linux server configuration using **Ansible, Terraform, and Shell scripting** to improve infrastructure consistency.
- Containerized **3+ applications** and engineered CI/CD pipelines using Docker, Jenkins, GitHub Webhooks, Maven, and Tomcat for automated application delivery.
- Completed **200+ hours of hands-on training** in RHEL Linux, AWS, Ansible, Jenkins, Docker, and Terraform, applying these technologies across automation, CI/CD, and AWS deployment projects.

## Projects

---

**Enterprise Infrastructure Automation using Ansible on AWS** | *AWS EC2 · RHEL 9 · Ansible · Apache · HAProxy · MariaDB · NFS · Prometheus · Grafana*

- Automated a **7-node AWS infrastructure** using 7+ Ansible roles and 5+ playbooks, implementing Infrastructure as Code (IaC).
- Engineered a **highly available infrastructure** with 2 Apache servers, HAProxy, NFS, and MariaDB for centralized application hosting.
- Implemented infrastructure monitoring using **Prometheus, Grafana, and Node Exporter** across multiple Linux servers.

**AWS Auto Scaling & Application Load Balancer** | *AWS EC2 · Auto Scaling · Application Load Balancer · Launch Templates · Target Groups · Apache · PHP*

- Deployed a **scalable AWS architecture** using Application Load Balancer and Auto Scaling Groups across 2 EC2 instances.
- Configured **50% CPU target tracking** to automatically scale between 1–2 instances based on application demand.
- Automated **PHP deployment through EC2 User Data** and validated both scale-out and scale-in operations.

- Provisioned a **LEMP-based WordPress platform** using 8 reusable Ansible roles.
- Streamlined **10+ infrastructure tasks**, including WordPress, MariaDB, phpMyAdmin, SSL, SFTP, and permission management.
- Secured the application with **Let's Encrypt SSL, DuckDNS, and automated Ansible templates** for production-ready deployment.

CI/CD Pipeline Automation with Jenkins | Jenkins · Docker · AWS EC2 · GitHub Webhooks · Maven · Tomcat · Django

- Developed **2 Jenkins CI/CD pipelines** for Java (Tomcat) and Python (Docker) applications.
- Automated **100% of the Java build and deployment process**, from Maven packaging to Tomcat deployment using Jenkins Pipeline.
- Integrated **Jenkinsfile and GitHub Webhooks** to enable continuous deployment with zero manual deployment steps.

Technical Skills

**Linux & Sysadmin:** RHEL 8, User & Group Management, Linux Permissions, Package Management (YUM/DNF/RPM), LVM, Troubleshooting, Systemd Services, SELinux, Firewalld, SCP

**Cloud:** AWS (EC2, IAM, VPC, Elastic IP, CloudWatch, Lambda, Auto Scaling, Launch Templates, Application Load Balancer), AWS CLI

**Networking:** TCP/IP, DNS, HTTP/HTTPS, VPC, NAT Gateway, Security Groups, SSH

**Monitoring & Alerting:** Prometheus, Grafana, AWS CloudWatch, Node Exporter

**Automation & IaC:** Ansible (Playbooks, Roles, Jinja2), Terraform

**Web Servers & Application Servers:** Apache HTTP Server, Nginx (PHP-FPM), Let's Encrypt SSL/TLS, Apache Tomcat

**Containers:** Docker, Docker Compose, Containerization

**DevOps & CI/CD:** Git, GitHub, Jenkins, GitHub Webhooks, CI/CD Pipelines, Maven

**Databases:** MariaDB, phpMyAdmin

**Programming & Scripting:** Python, Shell Scripting (Bash), YAML

Education

|                                                                                                                                                        |             |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>B.Tech in Computer Science and Engineering</b> (CGPA: 8.57)   College of Engineering, Kidangoor<br>APJ Abdul Kalam Technological University, Kerala | 2021 – 2025 |
| <b>Higher Secondary Education (Science)</b>   Infant Jesus BCGHS, Manarcad<br>State Board of Higher Secondary Education, Kerala                        | 2019 – 2021 |

Achievements & Certifications

- Scored **94/100** in the **RHEL Troubleshooting Lab Assessment** and earned *Outstanding Performance* recognition for diagnosing CPU, Apache, network, and permission-related issues.
- Achieved a perfect **10/10** in the **Root Access Challenge**, demonstrating proficiency in covering package management, user and group administration, permissions, security configurations, and shell scripting.
- Scored **9.5/10** in the **Container-Driven Virtual Lab Assessment** for deploying AlmaLinux environments using Podman under resource-constrained conditions.
- Completed the **Artificial Intelligence Internship Certification** from Pace Lab, Kochi.
